---

2 Assembling the AC Adapter

To assemble the AC adapter for your t180L, please do the following:

1. Unpack your thin client package and take out the AC adapter and its detached AC power cord.
2. Press the female end of the power cord into the male connector on the AC adapter.
   NOTE: The plug of the supplied power cord may vary with your area.

---

3 Getting Connected

To make connections for your t180L, please do the following:

1. Use USB ports 4 7 8 to connect a keyboard and mouse.
2. Connect and turn on the monitor(s).
   • If only the VGA monitor is available, use the supplied *DVI-I to VGA adapter* to connect it to your t180L.

   5 DVI-I port

   DVI-I to VGA adapter

   VGA cable

3. Connect the LAN port 9 to your local network with an Ethernet cable.
4. Connect the DC IN 10 to a power outlet using the AC adapter supplied.

---

4 Getting Started

To start using your t180L, please do the following:

1. Ensure that your *monitor is connected and turned on*.

   NOTE: Please note that you need to connect and turn on your monitor *before* powering up the thin client. Otherwise, the client may fail to set an appropriate resolution for the monitor.

2. *Press the Power button* to turn on the client.
   Wait a moment for *Atrust Quick Connection screen* to appear.

3. Go to 5 to set the time zone for the *first time* use.

   If the time zone had been set:
   (a) Go to 7 for accessing Microsoft Remote Desktop services.
   (b) Go to 8 for accessing Citrix services.
   (c) Go to 9 for accessing VMware View or Horizon View services.

Power Off	Local Desktop	Setup		Mixer	Network

Power Off	Click the icon to *suspend*, *shut down*, or *restart* the system.
Local Desktop	Click the icon to enter the local Linux desktop. To return to this screen from the local Linux desktop, see 6.
Setup	Click the icon to launch Atrust Client Setup.
Mixer	Click the icon to configure audio settings.
Network	Indicates the network type (wired or wireless) and status. Click the icon to configure network settings.

5. Configuring the Time Zone

To set the time zone for your t180L, please do the following:

1. Click the **Setup** ⚙ icon to launch Atrust Client Setup.
2. On Atrust Client Setup, click **System** > **Time Zone**.

Atrust Client Setup

Time Zone drop-down menu

3. Click the *Time Zone drop-down menu* to select the desired time zone.
4. Click **Save** to apply, and then close Atrust Client Setup.

## 6. Returning to the Quick Connection Screen

To return to *Atrust Quick Connection screen* when on local Linux desktop, please double click **Atrust Quick Connection** on that desktop.

7. Accessing Microsoft Remote Desktop Services

To access Microsoft Remote Desktop services, please do the following:

1. Click 🖥 Remote Desktop on Atrust Quick Connection screen.
2. On the appeared window, type in the computer name or IP address of the computer, user name, password, and domain (if any), and then click **Connect**.

NOTE: To discover available MultiPoint Server systems over your network, click 🔍 WMS , select the desired system, and then click **OK**. Type in data manually if the desired system cannot be found.

NOTE: To return to *Atrust Quick Connection screen*, press **Esc**.

3. The remote desktop will be displayed on the screen.
8. Accessing Citrix Services

Connecting to the Server

To connect to the server through which virtual desktops and applications are accessible, please do the following:

1. Click 🖥 Citrix on Atrust Quick Connection screen.
2. On the appeared *Atrust Citrix Connection screen*, enter the appropriate IP address / URL / FQDN of the server, and then click **Log On**.

   NOTE: FQDN is the acronym of Fully Qualified Domain Name.

Atrust Citrix Connection Screen

NOTE: To return to *Atrust Quick Connection screen*, press **Esc**.
Logging On to Citrix Services

When connected, the *Citrix Logon screen* appears. The appeared screen *may vary with* the service type and version.

NOTE: A message "This Connection is Untrusted" might appear. Consult the IT administrator for details and ensure the connection is secure *first*. To import a certificate, click **Setup** ⚙ > **System** > **Certificate Manager** > **Add**. To bypass, click **I Understand the Risks** > **Add Exception** > **Confirm Security Exception**.

The following is an example of Citrix Logon screens.

Citrix Logon Screen

Type the required user name, password, domain, and click **Log On** to access virtual desktops or applications.

This area will display *Citrix XenDesktop* or *Citrix XenApp*, depending on your Citrix service type.

NOTE: To return to *Atrust Citrix Connection screen*, press **Esc**.

NOTE: On *Desktop Selection* or *Application selection screen*, you can

- Use **Alt + Tab** to select and restore a hidden or minimized application.
- Click **Log off** on the top of the screen to return to *Citrix Logon screen*.
- Press **Esc** to return to *Atrust Citrix Connection screen* directly.

9. Accessing VMware View Services

To access VMware View or Horizon View services, please do the following:

1. Click 🖥 VMware View on Atrust Quick Connection screen.
2. On the opened window, double-click **Add Server** icon or click **New Server** in the top-left corner. A window appears prompting for the name or IP address of the VMware View Connection Server.

   NOTE: To return to *Atrust Quick Connection screen*, close the opened windows.

3. Enter the required information, and then click **Connect**.

NOTE: A window might appear with a certificate message about the remote server. Consult the IT administrator for details and ensure the connection is secure *first*. To import a certificate through a USB flash drive or a remote server, on Atrust Quick Connection screen, click **Setup** ⚙ > **System** > **Certificate Manager** > **Add**. To bypass, click **Connect Insecurely**.

4. A Welcome window might appear. Click **OK** to continue.
5. A window appears prompting for the credentials. Enter your user name, password, click the Domain drop-down menu to select the domain, and then click **OK**.

6. A window appears with available desktops or applications for the provided credentials. Double click to select the desired desktop or application.
7. The virtual desktop or application will be displayed on the screen.
